Software Engineer

A new graduate with 2+ years of hands-on experience in full-stack engineering and **leading** agile teams that delivered sleek, dynamic UI/UX which exceeded both client and user expectations.

PROJECTS

Crypto Betting App

Full Stack Engineer, Team Lead

03/2023 - 05/2023

- Developed, deployed, and maintained NodeJS server using ExpressJS to handle Auth0 authentication and routinely handle data calls to CoinGecko API endpoints, and CRUD functions for a document-based database.
- Engineered a work-around for stringent API rate limits resulting in reliable price quotes under five (5) minutes old.
- Managed Agile team's workspace and task board and hosted pair programming sessions in order to increase team efficiency and delivery times
- Cooperated with two (2) colleagues to design and implement Front-End architecture using ReactJS

Visual Portfolio

Lead Software Engineer, QA Lead

09/2022 - 11/2022

- Lead a team of three (3) front-end engineers in the design and implementation of UI/UX using framer-motion animation library over three (3) sprints to deliver a final product to client, achieving final project grade of 97/100
- Organized two (2) user-testing events, held client-acceptance testing meetings and conducted end-to-end and integration testing.

EDUCATION

B.S. Information Technology in Software Development

Georgia Gwinnett College • GPA: 3.5 • Dean's List: Spring/Summer 2023
